

# NICEST2 InfoBoard

You will find below the 5 most important news and outcomes of the NICEST 2 project.

1

**In-person hackathon on EDAM-geo 3-5 May 2022, Oslo (Norway):** we are organising a 3 days hackathon to extend the [EDAM ontology](#) for Geosciences. This in-person event will take place in Oslo (Norway). More information and registration [here](#).

2

**NeIC conference 2022** will take place in Oslo (Norway) from 30th May 2022 to 1st June 2022. Come and hear about the Climate Community research and data management: session is on 31st May 2022. You can register to the conference here: <https://www.deltager.no/event/neic2022>

3

**Training on Open Science with EOSC, 2-3 May 2022,** just after the NeIC 2022 conference, the Climate Community is organising a workshop to show you how to implement Open Science practices using EOSC services. It is a free and open to everyone event. Registration is coming soon.

4

**GPU and Climate Science.** Do you have any resources, training, webinars on GPUs for Climate Science? Or are you using GPUs for Climate Science? We are aiming at establishing a GPU working group for Climate Science in the Nordic. Reach out [jeani@uio.no](mailto:jeani@uio.no) if you are interested.

5

**ESMValTool diagnostics & NICEST 2:** we have reached out to researchers who were interested in getting support from NICEST 2 to integrate their diagnostics to ESMValTool. Stay tuned!
